Professional Summary

Detail-oriented Front-End Developer with 2.5 years of experience building responsive, high-performance web applications using React.js. Skilled in translating Figma designs into pixel-perfect, user-friendly interfaces. Proficient in JavaScript (ES6+), HTML5, CSS3, and component-based architecture with a solid grasp of UI/UX principles. Experienced in Agile/Scrum workflows, version control, and performance optimization. Committed to delivering scalable, maintainable solutions aligned with business goals and user needs.

Technical Skills

- Languages & Frameworks: HTML5, CSS3, JavaScript (ES6+), React.js, Knockout.js, SQL, Python (Basics)
- Tools & Platforms: Git, GitHub, GitLab, VS Code, Jira
- Concepts: Responsive Design, UI/UX Design, Component-Based Architecture, RESTful APIs, Redux, Context API, SAP CPQ(Basics)
- Other: Debugging, Browser DevTools, Agile Methodologies, Figma to Code Conversion.

Professional Experience

Software Engineer | Deloitte – Hyderabad, Telangana | Feb 2023 – Present

- Developed interactive and scalable web applications using React.js, adhering to modern development standards.
- Translated complex Figma designs into responsive, pixel-perfect front-end interfaces.
- Built reusable React components and libraries to ensure consistency and speed up development cycles.
- Integrated REST APIs to dynamically fetch and display data.
- Ensured cross-browser compatibility and optimized UI performance across devices.
- Collaborated in Agile teams with UI/UX designers, backend developers.
- Participated in daily stand-ups, sprint planning, and code reviews.
- Debugged UI bugs and performance issues using Chrome DevTools and profiling techniques.
- Used Git for version control, branching, and collaborative development.

Projects

Client Projects :

- **Apple** – Developed interactive components using **HTML**, **CSS**, and **JavaScript** libraries to enhance UI consistency across multiple product pages.
- **HPI** – Built and maintained dynamic web elements with **HTML**, **CSS**, and **JavaScript**, contributing to improved site performance and accessibility.
- **Pfizer** – Worked as a **React.js Developer** on internal applications focused on data visualization and dashboard interfaces. Optimized responsiveness and modular

component design.

- **Waste Management** – Developed scalable and responsive **React.js** components, streamlining UI workflows and integrating APIs for real-time data display.

Personal Projects:

E-Commerce Web Application : -

Tech Stack: React.js, JavaScript (ES6+), HTML5, CSS3, Local Storage, Figma

Live Demo: <https://hari-ecommerce.netlify.app> | Code:

<https://github.com/Sriharipentakota/GITPROJECT>

Description: Built a full-stack-like React front-end covering the entire user flow from login to order placement. Integrated local storage for auth and reusable components for listing, cart, and checkout.

ATS-Friendly Resume Builder : -

Tech Stack: React.js, JavaScript (ES6+), HTML5, CSS3, Local Storage, Figma

Live Demo: <https://hari-resume-formatter.netlify.app> | Code:

<https://github.com/Sriharipentakota/GITPROJECT>

Description: Created a web-based tool allowing users to add, edit, and export resume sections in Word or PDF formats. Built using React.js, with focus on form handling, state management, and export functionality for recruiter-friendly resumes.

Portfolio Website :-

Tech Stack: React.js, JavaScript (ES6+), HTML5, CSS3

Live Demo: <https://hari-portfoliowebsite.netlify.app> | Code:

<https://github.com/Sriharipentakota/GITPROJECT>

Description: Designed and built a personal portfolio website to showcase professional projects and technical skills.

- Implemented responsive layout using HTML5, CSS3, and JavaScript to ensure compatibility across devices.
- Used React.js to structure project sections dynamically and enhance interactivity.
- Emphasized clean UI/UX and deployed using Netlify for fast and reliable hosting.

Employee Management System :-

Tech Stack: React.js, JavaScript (ES6+), HTML5, CSS3, Node.js, Express.js, MongoDB Atlas

Live Demo: <https://hari-employee-management.netlify.app> | Code:

<https://github.com/Sriharipentakota/GITPROJECT>

Description: Developed a full-stack employee management system with a React.js frontend and RESTful API backend built using Node.js and Express.js, with MongoDB Atlas as the database.

- Backend APIs were generated using AI tools and deployed via Render; frontend was deployed using Netlify.
- Built responsive and dynamic UI with React.js, featuring real-time CRUD operations, search/filter functionality, and seamless API integration.
- Emphasized clean UX, efficient component structure, and consistent state management for optimal performance.

Frontend Concepts Showcase Project :-

Tech Stack: React.js, JavaScript (ES6+), HTML5, CSS3, React Router, Hooks, Context API

Live Demo: <https://react-keyconcepts.netlify.app> | Code:

<https://github.com/Sriharipentakota/ReactConceptsProject>

Description: Developed a React-based project demonstrating core front-end concepts with live, practical examples. Implemented routing, state management using hooks and context,

component reusability, and responsive UI design to serve as a learning and reference tool.

Education

Bachelor of Computer Science | Adikavi Nannaya University, 2022

Aditya degree college Kakinada | 8.5 CGPA

Key Achievements

- **Improved UI performance by 35%** by optimizing React component rendering and reducing unnecessary re-renders.
- **Cut page load time by 40%** through lazy loading, code splitting, and optimizing static assets.
- **Reduced frontend bugs by 50%** by implementing reusable components, consistent design patterns, and thorough testing.
- **Delivered 10+ responsive web pages** fully optimized for cross-browser and cross-device compatibility.
- **Transformed static Figma designs into pixel-perfect, dynamic UIs**, enhancing visual consistency and user experience.
- **Integrated 15+ RESTful APIs** to build interactive, data-driven interfaces with real-time updates.
- **Maintained 100% sprint delivery success rate** for over a year in Agile/Scrum teams, meeting all project deadlines.
- **Built a custom component library** in React to speed up development time by 25% across multiple projects.
- **Enhanced accessibility and SEO performance** by following semantic HTML5 standards and best practices.
- **Collaborated closely with backend and design teams**, ensuring smooth handoffs and cohesive product delivery.
